Textile Research

Vol. XI, 1940-1941

RESEARCH REPORTS AND ARTICLES

Subject Index

	PAGE
Abstract of Papers Presented before the Division of Cellulose Chemistry, American Chemical Society	289
Application of Rank Correlation to the Development of Testing Methods	482
Base-Combining Capacity of Cotton	238
Combination of Silk Fibroin with Acid and with Base	117
Combination of Wool Protein with Acid and Base: The Effect of Temperature on the Titration Curve	72
Comparison of Five Methods of Measuring Fineness of Cotton Fibers	459
Continuous Filament Rayon Slashing: Evaluation of Different Grades of Gelatins and Glues; Effect of Drying Warps to High Regains	356
Controls for the Size Box	12
Cross Sectioning of Textile Materials by Hand Without Microtome or Other Special Equipment	363
Direct Processing of Whole Cotton	245
Disposal of Textile Wastes with Domestic Sewage	321
Effect of Light and Heat on Color and Deterioration of Viscose, Acetate, and Cuprammonium Rayon Fabrics	4
Fabric Properties of Blends of New and Reprocessed Wool	314
Factors Influencing Flocculation and Precipitation. Theory and Variables	23
Fundamental Properties of Textile Wastes. Concentration of Sulfur Black Dyes by Froth Flotation	126
Instrument for the Study of Compressional Creep and Creep Recovery of Yarns and Fabrics	227
Inventory Management in Rayon Weaving	467
Microscopic Structure of the Cotton Fiber	200
of the Wool Fiber	415
One Year Textile Course for College Graduates	312
Oxidation of Wool Keratin by Potassium Permanganate	429
Photochemical Reactions in Silk	394
Plan for Long-Range Research Program for Institute Discussed at Textile Research Conferences	479
Reaction of Silk Fibroin with Diazomethane	15
Relation of Warp Sizing to Loom Efficiency	194
Relative Affinities of the Anions of Strong Acids for Wool Protein	259
Report on the Meeting of Subscribers to the Spun Rayon Warp Sizing Research	489
Research on Wool Fiber Damage	109
Rôle of Cystine in the Structure of the Fibrous Protein, Wool	379
Simplified Method for the Determination of Refractive Indices of Textile Fibers	62
Some Mechanical Factors Influencing Size Application	59
Summer Session Course in Textile Testing at M. I. T.	320
Sun Spots, Ionization of Air and Textiles	447
Surface Characteristics of Cotton Fibers as Indicated by Electrophoretic Studies	307
Surface per Gram of Cotton Fibers as a Measure of Fiber Fineness	30
Terms Relating to Hand of Fabrics	158
Textile Materials and the Time Factor. Mechanical Behavior of Textile Fibers and Plastics	171
Variation of Raw Cotton Constituents with Physical Properties	154
Washington Conference between the Institute and The Textile Foundation	480
X-Ray Studies of Silk Fibers	39

ABSTRACTS

Subject Index (Cross-Indexed)

A

PAGE

Absorbent Cotton 341
Absorption of Substantive Dyes by Cellulose from Solutions of Very High Dye and Salt Concentrations 99
Abrasion Tester 373
Acetate Co-polymeride Resins and Vinyl Chloride: Properties 161
Dress Fabrics: Gas Fading of Dyed 441
Rayon and Acetate Rayon Mixtures: Low Wear Resistance of Dyeings in 221
Dyeing—with Acid and Direct Dyes ... 100
Industry: The Problems of 251
Progress in the Treatment of 98
Stretched: Mechanical Properties 404
Acetylation of Cellulose: Mechanism of Acetylation and Properties of Intermediate Products 374
Origin of Primary Acetone-Soluble Cellulose Acetate 443
Achromatic Objective for Use in Ultraviolet Microscopy 53
Acid or Alkaline Baths: Automatic Control of .. 371
Derivatives: Fatty—and Their Importance in Regard to Softening and Color Fixation, with Special Reference to Sapamines 440
Dyeing: Density of Wool in Relation to 163
or Gas or Atmospheric Color Fading on Dyed Acetate Rayon Goods 99
Milling: Practice 338
Action of Alkylene Oxides on Cellulose 99
Actual Considerations on the Treatment and Dyeing of Wool 339
Air: Cleaning of—by Thermal Repulsion 443
Conditioning for Nylon Hosiery 252
Flow Measurements: Determination of Wearing Qualities by 254
Alcohol Extracts from Fine Wool: Investigation of 442
Aldehydes with Amines: Summary of Reactions of 412
Alginate Rayons: Production and Properties 469
Alizarin Red: Constitution 163
Alkaline or Acid Baths: Automatic Control of 371
Alkalis: Action of—on Wool 52
Alkylene Oxides: Action of—on Cellulose 99
Amino Acids: Aromatic Sulfonic Acids as Reagents for 443
with Formaldehyde: Reaction of—: X-Ray Diffraction Patterns 498
New Color Reaction of 476
Semimicroestimation of 168
Solutions: Surface Tension 443
Ammonium Carbonate as a Substitute for Calcined Soda 339

PAGE

Ammonium Sulfate: Replacement of Acetic Acid by—in Dyeing of Silk with Diazo Dyes 407
Amorphous Structure of Cellulose and Its Derivatives 293
Analogy Between the Molecular Structure and Mechanical Behavior of Cellulose and Rubber .. 500
Analysis of Cationic Surface-Active Agents of Trivalent Nitrogen Type 50
of Cellulose and Bleaching Methods for Cellulose Materials 53
of Form Double Refraction 103
of Frequency Charts to Determine Quality and Performance of Textile Fabrics 101
of Olive Oil 342
of Split Bath Method of Dyeing Silk Hosiery 440
Animal Fibers of Industrial Importance: Origin and Identification 336
Plasticity of 492
Reactivity of the Sulphur Linkage in 405
Textile Fibers: Constitution of 218
Anisotropy of Cellulose Sheet 95
Antiseptics for Textile Purposes 338
Application of "End-group" Method to Study of Composition of Cellulose Preparation .. 374
of Viscosity Data to the Determination of Shape of Protein Molecules in Solution . 438
Army Socks: Dyeing of 472
Aromatic Sulfonic Acids as Reagents for Amino Acids 443
Artificial Fibers and Fabrcis: Hydrophobing of .. 51
and Natural Fibers and Dyes: Structure 368
Association between Fibers and Dispersed Particles 50, 339
Atmospheric (Gas) Fading of Colored Cellulose Acetate 99
Automatic Control of Acid or Alkaline Baths 371
Azo Dyes: Positional Influence of Chlorine and of the Nitro-group on the Colors of Certain— 407

B

Baldus-Pross Spinning Process: Examination 97
Bandage Mull: Preparation 161
Behavior of Cellulose in Solutions of Alkalis 342
Bibliography on Flameproofing of Textiles 103
Black-Dyed Materials: Infrared Photography of .. 54
Bleached Cotton Duck: Physical and Chemical Changes Produced in—by Chaetomium Globosum and Spirochaeta Cytophaga 162
Bleaching and Dyeing of Jute 339
Blends on Cotton Equipment 252
Boiling-Out of Wool Dyeings 99

PAGE

Breaking Strength of Fabrics: Comparison of the —as Determined by Pendulum and Incline Plane Testing Machines 341

C

Calconese Colors: How to Dye Textiles with 50
Capillary Condensation in Pores of Sorbents and of Other Capillary Phenomena: Theory of—Taking into Account Disjoining Action of Polymolecular Liquid Films 412
Carbohydrates: X-Ray Investigations of 412
Carbonization of Silk Wastes 371
Carbonizing: Notes on 369
Carpet Trade Needs Rayon—Is Rayon Ready? .. 47
Casein and Staple Fiber Yarns: Properties 338
Wool and Lanital: Differentiation between .. 101
and Wool Yarns: Physical Properties of 49
Fiber: Cold-Dyeing of—and Determination of Casein Fiber in Mixtures 99
Content of Mixed Goods: Quantitative Determination of 54
Dyeing of 372
Making 250
Prevention of Sticking and Felting 95
Cellophane Membranes: Preparation of—of Graded Permeability 497
Cellulose: Absorption of Substantive Dyes by—from Solutions of Very High Dye and Salt Concentrations 99
Acetate: Atmospheric (Gas) Fading of Colored 99
Degradation 342
Films: Spontaneous Extension of 96
Rayons: Properties and Uses 439
Structure 103
Acetylation of: Mechanism of Acetylation and Properties of Intermediate Products . 374
Origin of Primary Acetone-Soluble Cellulose Acetate 443
Action of Alkylene Oxides on 99
Amorphous Structure of—and Its Derivatives . 293
Behavior of—in Solutions of Alkalis 342
Comparison of End-Group Determination and Viscosity of 440
Derivatives: Use in Plastics 443
Detection of Acid Groups in Native—by Salt Formation with Crystal Violet Base 444
Determination of Moisture in Native and Processed 101
Estimation of—Degradation 53
Ether Finishes for Textiles 340
Examination of Degradation Products of 299
Existence of a Fourth Modification of 491
Fabrics: Conditions of Development, Identification of Faults of—and Remedies for Molds 48
"Feltability" of—as Explained by Micellar Structure of Fibers 218
Fibers: Crystal Orientation in 45
Electron-Microscope Studies of Degradation of 470
"Graded-Temperature Process," a New and Simple Method for Dyeing Vat Colors on 340
Materials: Treatment of 220
Micellar Structure of 104
Regenerated: Dyeing Properties and Structure 253
Sorption of Water by 45
Stress-Strain Diagram of Isotropic—with Regard to Theoretical Relations between Swelling, Anisotropy, Orientation, and Strength 224
Structural Relation of Viscose Rayon to Natural— 303
X-Ray Studies of Crystallite Orientation in 304
Heats of Adsorption and Wetting of Mercerized—by Sodium Hydroxide Solutions, Water and Methyl Alcohol 342

PAGE

Hydrate—Mechanism of Deformation of: Viscosity Determination of Stretched and Unstretched Filaments 375
Hydrogen Bridging in—as Shown by Infrared Adsorption Spectra 491
Materials: Analysis of Cellulose and Bleaching Methods for 53
Mechanism of Degradation of 301
Method for Estimating the Internal Surface of—by Means of Thallous Ethylate 256
Micellar Structure of—and Its Derivatives .. 160
Micellar Structure of Native 46
Native and Regenerated 46
Preparation: Application of "End-group" Method to Study of Composition of .. 374
and Rubber: Analogy Between Molecular Structure and Mechanical Behavior of 500
Similarity of—and Formation of Fibers of Artificial Cellulose as a Macromolecular Process 302
Sheet: Anisotropy of 95
Swelling: Effect of Temperature and Concentration of Sodium Hydroxide Solutions 103
Effect of Temperature, Secondary Reagents, and Physical Properties on Swelling in Sodium Hydroxide Solutions 374
Structure of 96
and Other Polymers Related to Simple Sugars 97
Swelling, Alkali, Adsorption and Solubility in Alkali 293
Triacetate Solutions: Viscosity of—in Ethylene Chloride-Methanol Mixtures 344
X-Ray Studies Regarding Structure and Behavior of Native—Membranes 304
Cellulosic Coverings: Investigation of a Light-Aging Apparatus for 101
Materials: The Dyeing of 100
"Character" in Worsted Yarns 252
Chemical and Physical Changes in Vegetable Fibers Processed to Resemble Cotton 294
Chemistry of Silk and Silk Processing: Recent Developments in the 371
Chitin Xanthate and Regenerated Chitin 371
Chlorine: Positional Influence of—and of Nitrogroup on the Colors of Certain Azo Dyes 407
Test for Residual— 410
Chromaticity Scales and Color Vision 374
Cleaning of Air by Thermal Repulsion 443
Cold-Dyeing of Casein Fiber and Determination of Casein Fiber in Mixtures 99
Cold Process Weighting of Cotton Piece Goods .. 295
Collagen Fibers: Molecular Structure 56
Color: Control 440
Fastness on Spun Rayons 440
and Illumination in Photomicrography 442
Matching: Practical Art of 297
Names: ISCC-NBS Method of Standardization 103
of Pigment Mixtures 371
Vision and Chromaticity Scales 374
Coloration and Finishing of Textiles with Pigments 100
Colorimetric Determination of Sodium Hydrosulphite and Method of Determining the Hydrosulphite Content of Indigo Vats .. 373
Method of Determining Indigo 373
Comparative Investigations of Influence of Humidity on Stretch and Resistance to Tearing of Fabrics 47
Observations on Swelling of Jute Fiber 438
Studies in Determination of Quality of Fibers in Flax Stem 254
Comparison of Accuracy of Two Methods of Estimating Wool Fiber Fineness 373
of Breaking Strength of Fabrics as Determined by Pendulum and Incline Plane Testing Machines 341
of End-Group Determination and Viscosity of Cellulose 440
Compression Tests on Rayon Flock 53

PAGE
Constitution of Animal Textile Fibers 218
of Indigo on Basis of Light-Absorption Measurements 443
of Silk Fibroin 470
Cotton Cellulose: Dissolution of Chemically Modified—in Alkaline Solutions 444, 475
Low-Temperature Mercerization of 48
Properties of Oxycelluloses Formed in Early Stages of Oxidation of—by Periodic Acid and Metaperiodate 302
Viscosity of Products of Fractioning of 304
Cotton, Cuprammonium Rayon and Ramie Fiber: Absorption of Alkali, and Swelling 294
Determination of Iron and Chromium in ... 341
Dyeing—with Basic Dyestuffs 472
Equipment: Blends on 252
Fabrics: Making—Crease-Resistant 406
Methods for Determination of Durability of 341
Porous Stiffened: Production 370
Fibers: Effect of Length on Spinning Quality 252
Maturity 336
Swelling of—in Sodium Hydroxide Solutions and in Presence of Lyotropic Substances 497
Finishing Unshrinkable—Fabrics 295
Hose: Water Repellency of 220
Hydrophile, Bandage, Hospital and Sanitary Cotton and Their Practical, Simple Manufacture 161
Piece Goods: Cold Process Weighting of 295
and Rayon Fabrics: Formaldehyde Treatment for Finishing 338
An Improved Azoic Color Printing Process for 473
and Rayon Fibers: Structure 294
Rayon Mixtures: One-bath Dyeing and Desizing of 51
and Silk Sewing Thread Constructions 162
Staple Fiber-Cottonized Hemp Mixtures: Analysis 165
and Viscose: Separation of—by Solvent Action 409
Crease Resisting Processes for Textiles 161
Crepe: Pebble in 296
Crepe-de-Chine Hosiery Yarn 439
Cross-Sectioning Microtome for Textile Fibers 442
Crystal Orientation in Cellulose Fibers 45
Cuprammonium-cellulose Solutions: New Process for Manufacture of Cotton-like Yarns by Stretch-spinning of 250
Rayon, Cotton and Ramie Fiber: Absorption of Alkali, and Swelling 294
Cüstrier Process for Increasing the Wear Resistance of Textiles 161
Cystine Content of Merino Wool in Relation to Its Physical Attributes 337
